
THE LITTLE MOON
WHO WANTED TO SHINE
Created by Hamidreza Rostami

High above the sleeping world, the night sky was full of shining lights.

EVERY STAR LOVED TO SHINE BRIGHT.
EVERY STAR EXCEPT LITTLE LUNA.

Luna tried and tried.
She glowed. She sparkled.
But her light stayed soft gentle
and gentle.

One night, the Sun
looked down and smiled.
Little Luna, I have a secret.

You do not need to shine bright
like the stars, said the Sun.
Your gentle light is special too.

Luna smiled.
But the world needs
bright light,
she said.
Does it need
my gentle glow?

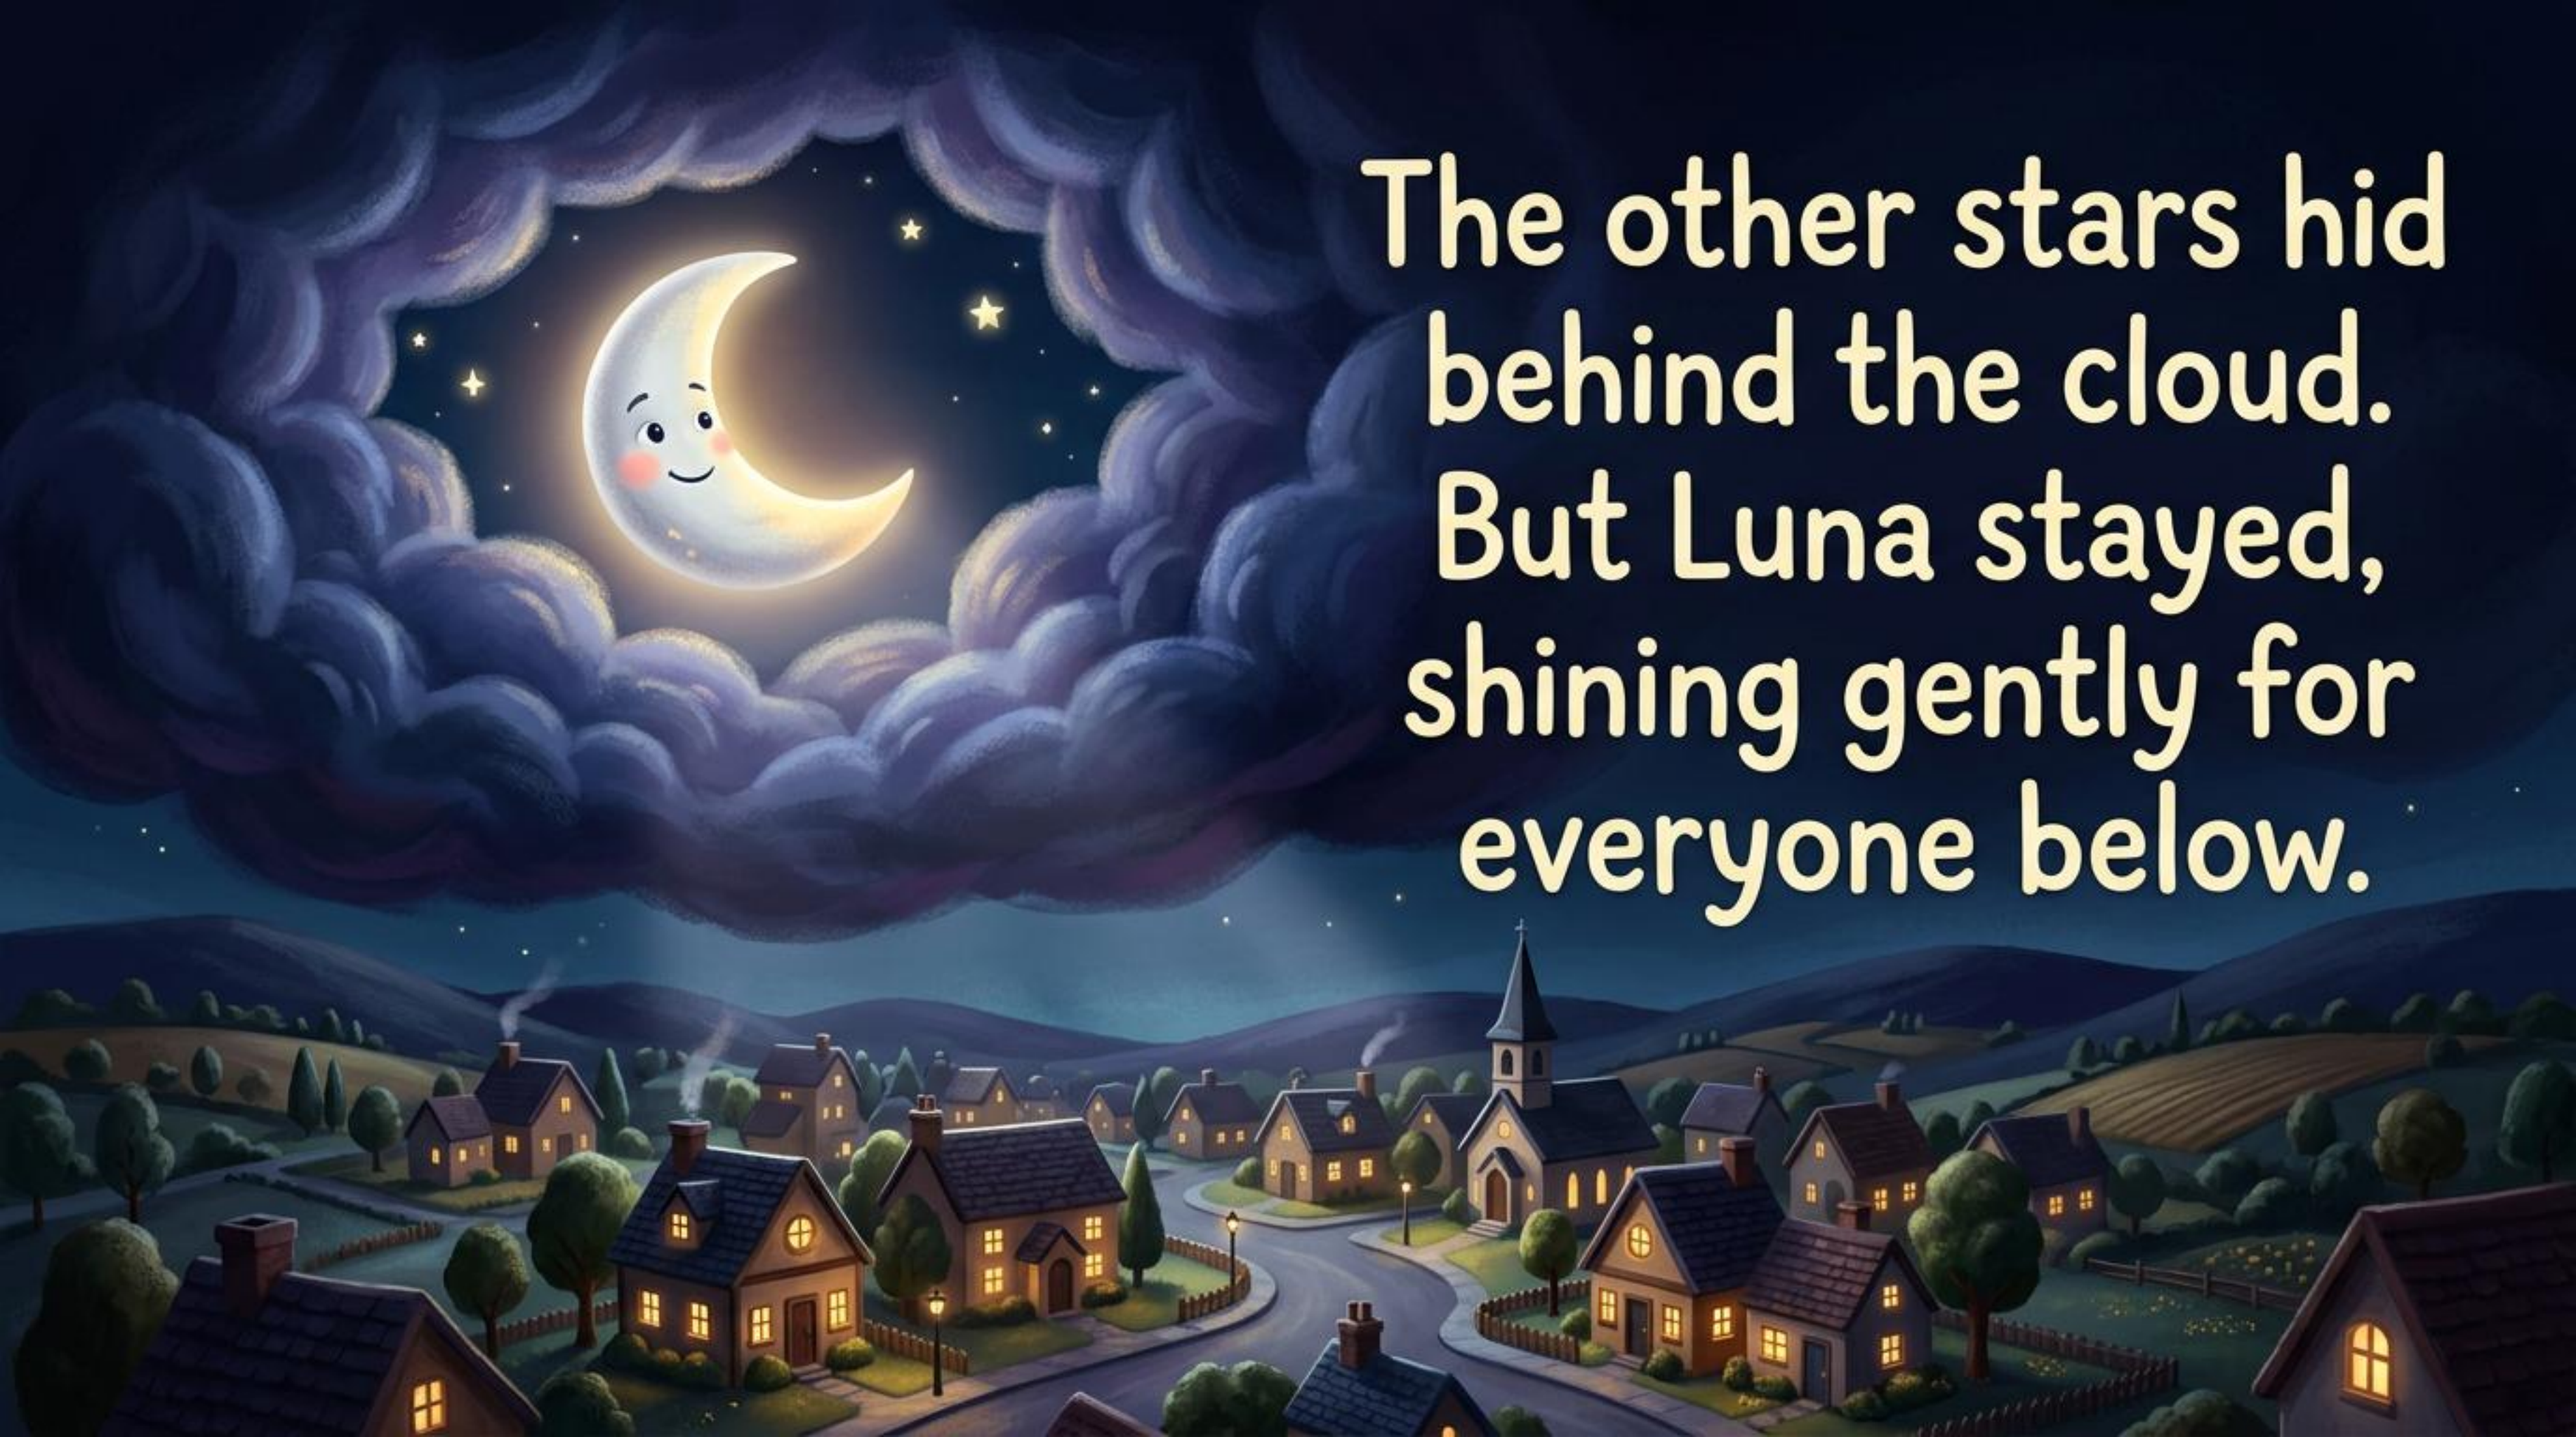

That night, a little child
looked up at the sky
and whispered,
“I cannot sleep.
It is too bright.”

Luna shone her
gentle silver light
through the window.
Soft. Calm.
Just right.

“Thank you, Luna,”
whispered the child.
“Your gentle light helps me sleep.”

Luna felt warm and happy inside. Her heart glowed brighter than any star.

Then a big dark cloud drifted by
and covered the bright stars.

The other stars hid behind the cloud. But Luna stayed, shining gently for everyone below.

Then something magical happened. Luna’s gentle light began to shine, softer and brighter than ever before!

The child woke up and smiled.
“The moon is watching
over me,” she said.

Luna realized she did not need
to be bright like the stars.

She just needed, to be herself,
gentle, kind, and shining
in her own special way.

And every night, children all over the world the world and felt safe under Luna's gentle glow.

Luna was no longer the little
moon who wanted to shine.

Luna is a little moon whose light is soft and gentle. She longs to shine bright like all the stars. When she helps a child sleep peacefully, Luna discovers a wonderful secret: you are special just as you are, and your gentle light matters to the world. A gentle bedtime story about self-acceptance, kindness, and shining in your own way.'
